Lupus Initiative Kolkata is a Voluntary Health Organization formed in 2009 at Kolkata to support the persons suffering from lupus. The mission of Lupus Initiative is to educate and develop awareness among the lupus patients and their caregivers to foster better life of people living with lupus. The organisation is involved in activities relating to lupus. Lupus Initiative Kolkata organises updates for physicians and holds meets for people with lupus and their family members to share thoughts and provide advice regarding medical care as well as social support. The organization has published patient education booklets in English and local vernacular as part of the activity. LIK envisages a common platform of all lupus activities including academic update for caregivers, and support program for people with lupus.
